

Standart Required

- 1.xampp php & mysql versi 7.4
2. Vscode | Sublime Text | Notepad

Instalasi Bumdes Petanismart

1. Extrack file zip kedalam folder htdocs
2. Import database petanismart.sql kedalam phpmyadmin/navicat atau dbms lainnya
3. Setting database di bagian file application → config → database.php

Pada bagian database, sesuaikan dengan nama database yang ada pada phpmyadmn/navicat/dbms lainnya.

Tergantung kalian make apa, tapi kalau kalian ngerujuk ke pelajaran pak rodianto harusnya kalian make navicat, saran saya make phpmyadmin aja.

Standart Required Bumdes Simpan Pinjam

1. xampp php & mysql 8.0
2. Vscode | Sublime Text | Notepad
3. Composer

Instalasi

1. Extrack file zip kedalam folder htdocs
2. buka terminal vscode ketikan
composer install
3. Setelah itu kik bagian .env untuk setting database
4. Import database ke DBMS
5. Jalankan dengan ketik php spark serve

The screenshot shows the Visual Studio Code interface with the `.env` file open. The file contains database configuration for a Laravel application. The terminal shows the output of the `php spark serve` command, indicating that the application is running successfully on port 3306.

```
.env
# app.forceGlobalSecureRequests = false
# app.CSPEnabled = false
#-----
# DATABASE
#-----
database.default.hostname = 127.0.0.1
database.default.database = bumdessss
database.default.username = root
database.default.password = 
database.default.DBDriver = MySQLi
database.default.DBPrefix = 
database.default.port = 3306
# database.tests.hostname = localhost
# database.tests.database = ci4_test
# database.tests.username = root
# database.tests.password = root
```
